**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant has amended claim 15 to include the phrases “substantially free edges” and “substantially open-sided channel”. The specification is silent as to the meets and bounds of these phrases and therefore impossible to interpret the claims in view of the prior art.

***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Claim 15; ...wherein the curved second portion has side edges that are substantially free edges forming a substantially open-sided channel.

***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 15 is rejected under 35 U.S.C. 103(a) as being obvious in view of USP 603,547 (Wolff).

The Wolff patent discloses a wringer comprising an upper support wall (10) a second depending support walls (14) a first depending support wall (16), a wringer surface (17) and a second portion (18,19,20). The first dependent support wall (16) joins the wringer surface at a point which is the lowermost portion of the wringer (see figure). Although it is difficult to tell it does appear that where the wall (16) and surface (17) join, that portion is closer to the free surface instead of the upper support wall. Figure 3 shows the wringer surface having free edges 17 forming a substantially open channel.

However, it would have been obvious to one skilled in the art to extend the second depending wall so as to provide greater stability of the wringer on the edge of the bucket in which case the structure would read on applicants claims.

***Allowable Subject Matter***

The following is a statement of reasons for the indication of allowable subject matter: The rejection of claim 16 in view of USP 603,547 (Wolff) has been withdrawn since Wolf does not teach or suggest a free edge of the second portion at a lower vertical position than the line joining the wringer surface with the first depending support wall.

Claims 1-14,16-18 are allowed.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
